# Security is our Passion

Six decades of experience in developing and manufacturing security solutions for our clients worldwide lead us to one conclusion: as life- and workstyles become more flexible and mobile, secure storage becomes increasingly important. A wide range of technologies is available for this purpose. As your partner, we know that the technology is the

tool to provide you with the perfect solution for your requirements. As a family-owned Westphalian enterprise, we focus our research and development, production and service at your disposal to find the perfect blend of your ideas and our "Made in Germany" technical solutions.

# Why choose LEHMANN?

Storage is versatile and must constantly adapt to new needs. LEHMANN offers you a single-stop source for all of your storage security requirements. For more than 60 years we have supplied furniture manufacturers with high quality mechanical and electronic locking systems; we know the furniture industry. Are you wondering how to integrate storage from different furniture makers into your harmonized security concept? Leave it to us! We will coordinate with your suppliers to ensure that you get your customized solution including project management with satisfaction guaranteed.

# Networked RFID-Systems

8 A networked RFID system is the ideal solution for lockers in public centers, in sports and fitness facilities as well as in offices. Decentralized organizations in particular benefit from the advantages of a networked locking system, which requires no batteries and is therefore environmentally friendly. Convenient operation is guaranteed by using RFID transponders such as employee ID cards. Networking with LEHMANN Management Software LMS allows configuration and authorization changes to be implemented in real time, without requiring the administrator to visit the locks. Efficient management of multiple, large facilities is finally a reality!

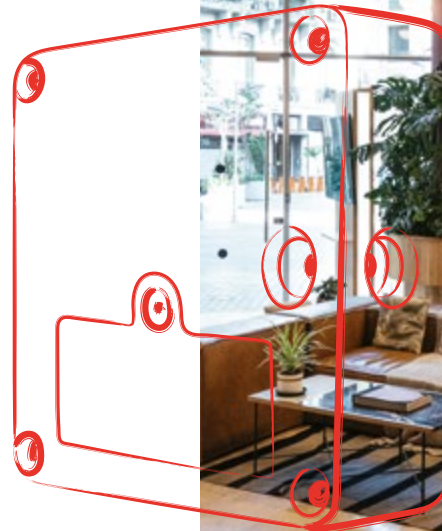

CAPTOS iCHARGE

- + Remote management of authorizations in real time
- + Status display of the lockers
- + USB charging function for mobile devices
- + RGB backlighting

# Autonomous-powered RFID-Systems

Locking and unlocking can't be any easier. Simply hold the RFID transponder (for example, the employee ID card) in front of the door and it opens. Installation is simple—even retrofitting is possible—and operation is intuitive. Time-consuming key management is eliminated, replaced by a uniform operating and configuration concept. Multi-level battery warnings support continuous, problem-free operation. Can locking and unlocking be any easier?

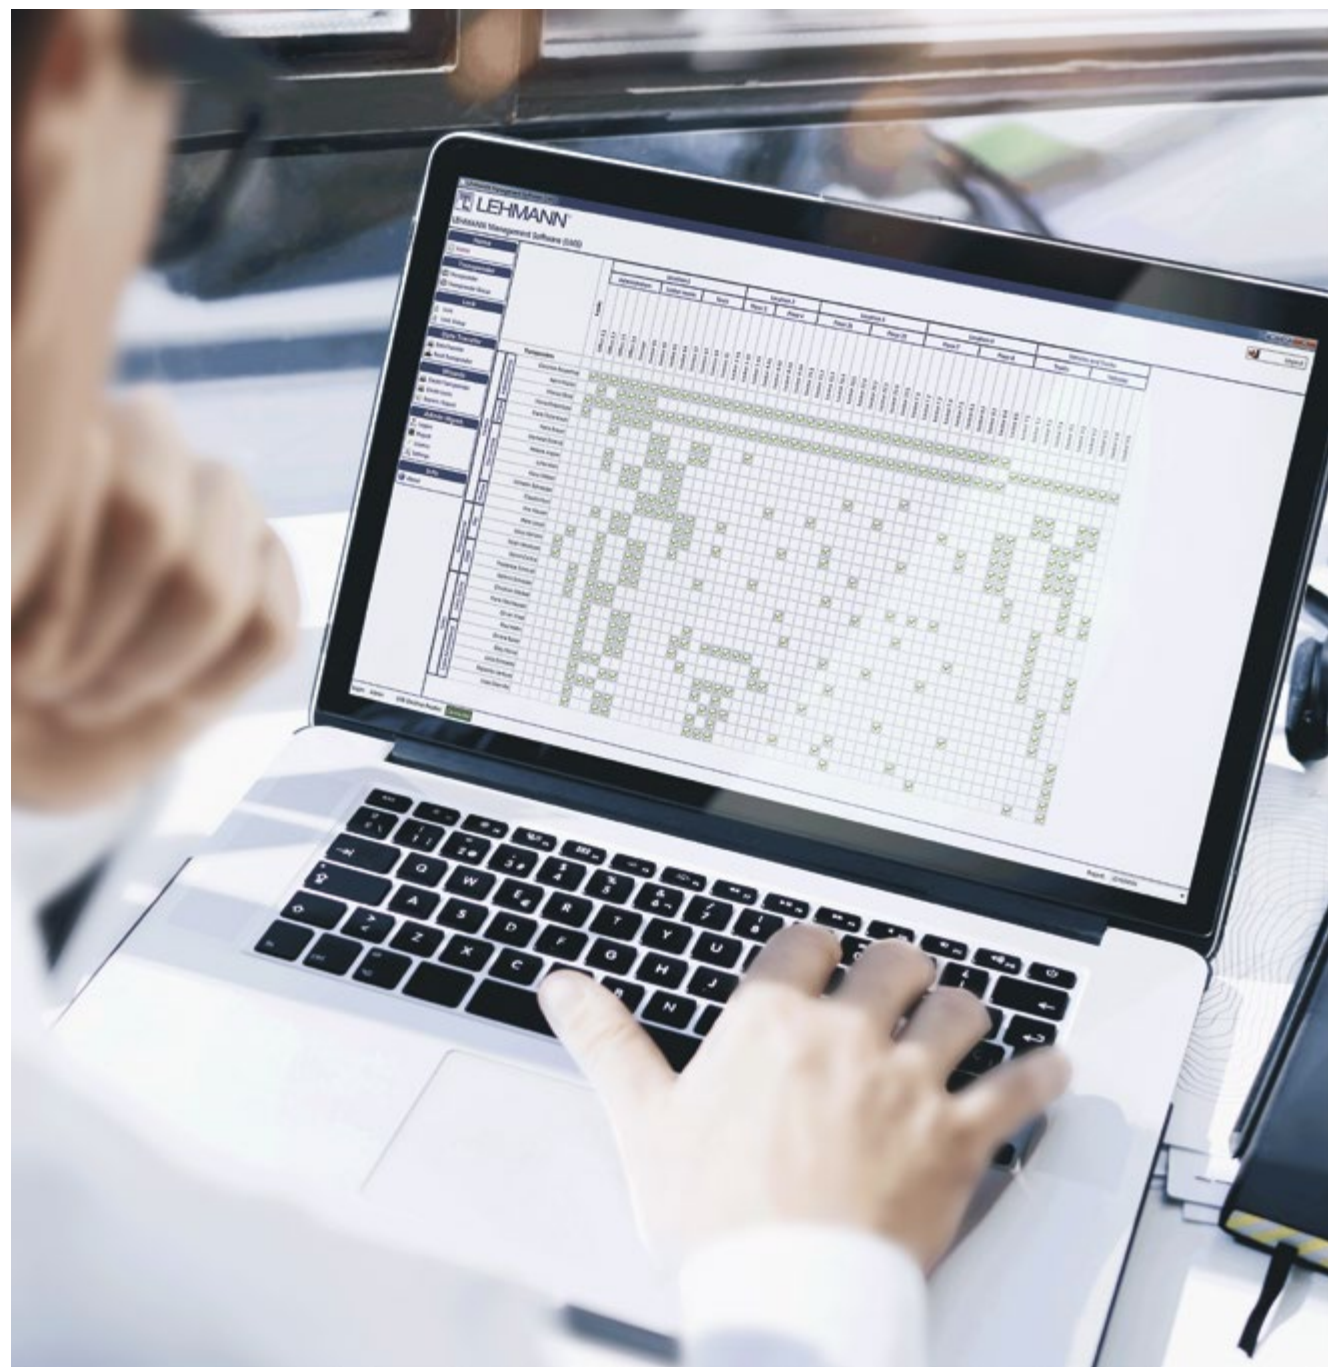

CAPTURA

- + Comprehensive energy management with battery warning
- + Change of operating mode: assigned use or shared use
- + Automatic locking can be configured
- + Optical and acoustic signals

# LEHMANN Management Software

Configuration and management of multiple locks has never been so easy. LEHMANN Management Software LMS is intuitive to use and offers you the perfect overview. In combination with our RFID systems, LEHMANN Management Software LMS provides you with the highest level of security.

### LMS-Basic

- + Easy configuration of LEHMANN RFID systems
- + Intuitive handling and menu navigation for managing authorizations
- + Assistance functions support the user
- + Software as a stand-alone application or as a company-wide network solution

### LMS-Online

- + Remote assignment of access rights
- + Realtime status information
- + Activity Log
- + Reduction of operating costs

# Keyless Security Solutions

Our lifestyle has never been more mobile and flexible than it is today. As a result, mechanical keys that users carry with them to operate just one lock have become obsolete. With LEHMANN's keyless security solutions, the hassle of key management and the procurement of replacement keys are eliminated. How does it work? Quite simply, users no longer need keys. They can choose their own personal codes and change it at any time. Should the code ever be forgotten—no problem! With the emergency opening function, facility management can solve the issue, quickly and effectively. Our keyless security solutions are available as mechanical combination locks or as electronic keypad locks.

+ Service & Support

” As part of our new office design, we installed 500 lockers with Lehmann RFID locks ... They were professional and helpful throughout, and worked tirelessly until they found the solution to our problem. I can't thank them enough and would definitely recommend Lehmann and their locks. “

Dawn Herbert  
Office Services Manager  
Chaucer Group  
London

# Security. Almost Invisible.

Today's modern working environments offer different areas that are used flexibly by different people. Flexibility and mobility have become a way of life. Yet the need for privacy remains. A place to keep personal belongings, devices, documents and valuables safe. Whether you choose mechanical, electronic or combination locks, with LEHMANN you know they are well protected.
