LEHMANN®

Functional design

Types 320 / 320.01

Types 321 / 321.01

Types 322 / 322.01

Compliance with current security standards and high quality design are a must for shop and store fitting. Because in business, the most exclusive items have to be displayed behind glass in their proper setting, without detracting from the necessary security.

The locks for glass doors are available in three replacement cylinder system variations having the same dimensions

■ **VCS 18.2**

■ **PRESTIGE 2**

■ **PRESTIGE 4**

and they thus guarantee flexibility and versatility in use.

Aesthetic surface finishes

The design, in combination with aesthetic surface finishes, produces an excellent appearance. The optionally available galvanised and lacquered surfaces such as gold or silver adapt themselves harmoniously to the most varied shop and outfitting concepts in store, display window, and architectural projects.

System range

Lock for sliding glass door 326

Lock 311 / 315

Sliding shoe lock 282 / 676

The modular system range is rounded out by the lock for sliding glass door 326 plus bolt locks 311 and 315, as well as sliding shoe locks 282 and 676.

In addition to the standard cylinder cores from the PRESTIGE or VCS 18.2 range, glass door locks may optionally also be fitted with the “PRESTIGE Signal” or “Z77 TRIKEY” special cylinders.

As well as the mechanical solutions, there is also a wide choice of electronic locks from the “e-solutions” system range.

e-solutions

Various identification processes provide the right solution for every requirement. Whether radio transmitter, PIN code via a keypad, or biometric recognition via a finger scanner, extremely straightforward operation without additional software is guaranteed.
